Dear Hiring Manager,

I'm excited to apply for the AML Compliance Analyst position with Security Service Federal Credit Union. With several years of experience conducting AML/BSA investigations, OFAC screening, transaction monitoring, and SAR decisioning across high-risk payment channels, I'm confident in my ability to support SSFCU's commitment to regulatory integrity and member protection.

My background includes reviewing system-generated alerts, analyzing transactional behavior against historical patterns, and conducting detailed account reviews to identify irregular or suspicious activity. I've drafted and filed SARs, performed 314(b) information sharing, and collaborated with business units to gather supporting documentation. My experience spans wires, ACH, correspondent banking flows, and member-level activity, giving me a strong understanding of financial products, money laundering typologies, and risk indicators relevant to credit union environments.

I'm highly organized, detail-oriented, and comfortable managing investigations independently while communicating clearly with compliance leadership. I've worked extensively with AML case management systems and aggregation tools, and I'm familiar with best practices for documenting investigative steps, escalating findings, and ensuring consistency with BSA/AML regulatory expectations. I also value continuous learning and professional maturity—qualities that align closely with SSFCU's core values of Caring, Innovative, Honest, Fair, and Dedicated.

What draws me to SSFCU is the organization's reputation for stability, member-focused service, and investment in employee growth. I'm motivated by the opportunity to contribute to a team that prioritizes accuracy, integrity, and community impact while maintaining a strong culture of compliance.

Thank you for your time and consideration. I would welcome the opportunity to bring my investigative experience, analytical mindset, and commitment to regulatory excellence to SSFCU's AML team.

Sincerely,

Francisco J. Peralta
