Dear Hiring Manager,

I'm excited to apply for the BSA/AML Data Analyst position at Green Dot. My background includes 8+ years of AML investigations across high-risk payment channels, including correspondent banking, wires, ACH, and cross-border flows. Working in these environments has given me a deep understanding of payment behaviors, nested activity, intermediary bank structures, and the data patterns that signal elevated risk. That experience translates directly into the analytical, data-driven approach Green Dot is looking for.

In my previous roles, I routinely analyzed large volumes of payment data, conducted flow-of-funds reviews, and identified anomalies tied to transaction velocity, counterparties, and jurisdictional exposure. I've drafted SARs involving complex payment typologies, escalated unusual correspondent activity, and collaborated with cross-functional teams to refine monitoring logic. This work strengthened my ability to interpret data in context, spot emerging trends, and communicate findings clearly to both technical and non-technical stakeholders.

What draws me to Green Dot is the opportunity to support a modern, data-centric AML program —building dashboards, supporting rule tuning, optimizing workflows, and contributing to metrics that reflect real program performance. The permanent “Work from Anywhere” model and the company’s mission to expand access to smart financial tools make this role an ideal fit for how I work best: focused, analytical, and collaborative.

I would welcome the chance to bring my payments experience, investigative judgment, and data-driven mindset to Green Dot’s BSA/AML team.

Sincerely,

Francisco J. Peralta
